International Journal of Theoretical Physics

Volume 28, Number 1 January 1989

CONTENTS

Important Announcement 1

Propagator, Sewing Rules, and Vacuum Amplitude for the Polyakov Point Particle with Ghosts 3
Ioannis Giannakis, Carlos R. Ordóñez, Mark A. Rubin, and Roberto Zucchini

Sets of States and Extreme Points 27
Karsten Keller

Quantum Causal Structure and the Einstein-Podolsky-Rosen Experiment 35
László Szabó

Position and Quantum Theory 49
Jack Cohn

Wave Propagation in Strongly Coupled Quasi-One-Dimensional Quantum Plasma in a Magnetic Field 63
R. O. Genga

High-Frequency Expansion of Relativistic Classical Plasma Dielectric Tensor 71
R. O. Genga

Quasi-Maxwellian Fields in Riemann–Cartan Spacetime 79
L. C. Garcia de Andrade

Anomalous Behavior of a Scalar Particle in a Globally Regular Space-Time of a Schwarzschild Black Hole 83
Huang Danhong and Shen Wenda

Homogeneous Bianchi Type VI_0 Perfect Fluid Space-Times 97
Shri Ram

New Stiff Matter Solutions to Einstein Equations 105
Joseph Hajj-Boutros

Solution of Coupled Differential Equations of Soliton Theory 111
Kamal Kumar Ghosh, Dipanker Ray, and Pranab Chanda

New Coupled Liouville System: Prolongation Structure, Soliton Solution, and Complete Integrability 119
A. Roy Chowdhury and Pritha Mitra

Periodic and Solitary Wave Solutions of the Three-Wave Problem. A Different Approach 127
A. Roy Chowdhury, M. Debnath, and R. S. Banerjee

Erratum: Discrete Gradients in Discrete Classical Mechanics 135
L. Renna

International Journal of Theoretical Physics

Volume 28, Number 2 **February 1989**

CONTENTS

Quantum-Gas Model Estimate for Wide Range of Superconducting Critical Temperatures 137
Mario Rabinowitz

Entropy Balance in "Pure" Interactions of Open Quantum Systems 147
R. Urigu

The Leibniz Principle in Quantum Logic 159
Roberto Giuntini and Peter Mittelstaedt

Grand Unified Models Including Extra Z Bosons 169
Tie-zhong Li

Supersymmetry and the Ladder Operator Technique in Quantum Mechanics: The Radial Schrödinger Equation 183
Anuradha Lahiri, Prodyot Kumar Roy, and Bijan Bagchi

Brans-Dicke Cosmological Exact Solution in a Radiation-Filled Robertson-Walker Universe 191
Ashis Basu and Dipankar Ray

Stability of Sets for Impulsive Systems 195
G. K. Kulev and D. D. Bainov

Asymptotic Procedure for Solving Boundary Value Problems for Singularly Perturbed Linear Impulsive Systems 209
D. D. Bainov, M. A. Hekimova, and V. M. Veliov

Solution of the Five-Dimensional Vacuum Einstein Equation in Kaluza-Klein Theory 227
Ashis Basu and Dipankar Ray

Maximum Mass-Particle Velocities in Kantor's Information Mechanics 231
Daniel I. Sverdlik

Global Energy-Momentum Conservation in General Relativity 235
Noah Nissani and Elhanan Leibowitz

International Journal of Theoretical Physics

Volume 28, Number 3 **March 1989**

CONTENTS

Coexistence of Observables 247
Franklin E. Schroeck, Jr.

Modification of the Superstring Action and the Exceptional Jordan Algebra 263
R. Foot and G. C. Joshi

Particle Decay Model 273
Stanley Gudder

Order-Independent Method of Characteristics 303
Dominic G. B. Edelen

Nonlocal Conserved Quantities, Balance Laws, and Equations of Motion 335
Laurence I. Gould

Local and Global Algebraic Structures in General Relativity 365
G. S. Hall and A. D. Rendall

Total Linearization of Probability Density Evolution Equations 377
H. Tomasz Grzybowski

International Journal of Theoretical Physics

Volume 28, Number 4 April 1989

CONTENTS

Classical Chaos and Quantum Level Density of an Anharmonic Oscillator 381
Jian-ling Li and Rong-yu Zhou

Mechanism of Blackbody Radiation 391
B. H. Lavenda and W. Figueiredo

Inflationary Brans-Dicke Universe and G 407
Amar Chandra Patra, Mahendra Nath Sinha Roy, and Dipankar Ray

Quantum Stationary State of Class A Bianchi Universe 415
Amar Chandra Patra, Mahendra Nath Sinha Roy, and Dipankar Ray

A Nonlinear Gauge-Invariant Field Theory of Leptons 423
F. I. Cooperstock and N. Rosen

Quantum Net Dynamics 441
David Finkelstein

Discontinuous Automorphisms of the Proper Galilei and Euclidean Groups 469
S. A. Adeleke

Accelerating Kortweg-de Vries Solitons 481
G. K. Sen and D. K. Sinha

Cosmological Models 487
J. Hajj-Boutros

International Journal of Theoretical Physics

Volume 28, Number 5 May 1989

CONTENTS

Stimulated Emission of Photon Excitations by External Currents in Spacetime 495
Edward B. Manoukian

Stimulated Emission of Relativistic Particles by External Sources in Spacetime 501
Edward B. Manoukian

Homotopically Nontrivial Solutions for a Spherically Symmetric Gravitational Field 511
Tina A. Harriott and J. G. Williams

A Solution Spectrum of the Nonlinear Schrödinger Equation. II 527
W. Ulmer

Locally Equilibrium Diffusion Processes. I. Geometry of Local Thermodynamic Equilibrium States 543
Andrzej Trzęsowski

Locally Equilibrium Diffusion Processes. II. Generalized Stochastic Mechanics and Plastic Yielding 565
Andrzej Trzęsowski

Mass Loss by Gravitational Radiation in Synge's Theory 587
J. M. Gambi, A. San Miguel, and F. Vicente

International Journal of Theoretical Physics

Volume 28, Number 6 June 1989

CONTENTS

Entropy and P-Particle Observables. II. The Two-Particle Entropy S_2 605
Henry E. Kandrup

Einstein's Theory of Quantum Radiation 619
B. H. Lavenda

Gravity and Gauge: A New Perspective 633
Dominic G. B. Edelen

Connections between Abstract Quantum Theory and Space-Time Structure. III. Vacuum Structure and Black Holes 651
Thomas Görnitz and Eva Ruhnau

New Class of Finsler Metrics 659
R. G. Beil

Self-Similar Cosmological Model: Introduction and Empirical Tests 669
Robert L. Oldershaw

Applications of Dynamical Algebra of Invariance of Integrodifferential Equations 695
K. A. Rustamov

International Journal of Theoretical Physics

Volume 28, Number 7 July 1989

CONTENTS

Thermal Representation of the Energy Density in Bounded Spaces 699
G. Cocho, S. Hacyan, A. Sarmiento, and F. Soto

Mielnik and Cantoni Transition Probabilities 711
Sylvia Pulmannová

Nonlocality and Stochastic Quantization of Field Theory 719
M. Dineykhan and Kh. Namsrai

Entropy of Semiclassical States in Chaotic Cosmology 765
G. Francisco

Classification of the Even–Even Nuclei in Symplectic Multiplets 769
A. Georgieva, M. Ivanov, P. Raychev, and R. Roussev

A Propagator Theory Applied to Wave Mechanics in Phase Space 787
Ademir E. Santana, A. Matos Neto, and J. D. M. Vianna

Exponential Dichotomy of Linear Impulsive Differential Equations in a Banach Space 797
D. D. Bainov, S. I. Kostadinov, and P. P. Zabreiko

Existence of Integral Manifolds for Impulsive Differential Equations in a Banach Space 815
D. D. Bainov, S. I. Kostadinov, Nguyễn Hồng Thái, and P. P. Zabreiko

International Journal of Theoretical Physics

Volume 28, Number 8 **August 1989**

CONTENTS

Axisymmetric Vacuum Fields in General Projective Relativity 835
T. Singh and G. P. Singh

Kac-Moody Algebra, Nonlocal Symmetries, and Backlund Transformation for KdV Equation 845
A. Roy Chowdhury and Swapna Roy

Geometry of the Submanifolds of SEX_n. I. The C-Nonholonomic Frame of Reference 851
Kyung Tae Chung, Keum Sook So, and Jong Woo Lee

Geometry of the Submanifolds of SEX_n. II. The Generalized Fundamental Equations for the Hypersubmanifold of SEX_n 867
Kyung Tae Chung and Jong Woo Lee

N = 2 Supersymmetric Ward Identities and Renormalized BRS and Anti-BRS Operators in Harmonic Superspace 875
T. Lhallabi

High-Frequency Sum Rules for Classical Relativistic Plasmas in a Magnetic Field 893
R. O. Genga

An Anisotropic Magnetized Viscous Fluid Cosmological Model in General Relativity 903
Raj Bali and Deepak Raj Jain

Nonuniqueness of the Factorization Scheme in Quantum Mechanics 911
A. Mitra, P. K. Roy, A. Lahiri, and B. Bagchi

LRS Bianchi Type I Perfect Fluid Solutions Generated from Known Solutions 917
Shri Ram

Macroscopic Deviations from Coulomb's Law without a Photon Mass 923
George L. Murphy

International Journal of Theoretical Physics

Volume 28, Number 9 **September 1989**

CONTENTS

Thermodynamics and Cosmology 927
I. Prigogine

From Unstable Minkowski Space to Inflation 935
P. Nardone

Entropy and Black-Hole Evaporation 943
E. Gunzig and P. Nardone

Primordial Superstrings and the Origin of the Universe 949
Enrique Alvarez and M. A. R. Osorio

Optical Theorem in Curved Space-Time Quantum Field Theory 957
Jürgen Audretsch

Is the Cosmological Singularity Thermodynamically Possible? 967
Jacob D. Bekenstein

Modern Cosmology: The Harmonious and the Discordant Facts 983
G. Burbidge

Atomic and Gravitational Clocks 1005
V. M. Canuto and I. Goldman

Astrophysical Consequences of a Violation of the Strong Equivalence Principle 1019
V. M. Canuto and I. Goldman

Experimental Test of the Variability of G Using Viking Lander Ranging Data 1035
R. W. Hellings, P. J. Adams, J. D. Anderson, M. S. Keesey, E. L. Lau, E. M. Standish, V. M. Canuto, and I. Goldman

Probabilistic Time and the Quantum Gravity Interpretation 1043
Mario A. Castagnino and Francisco D. Mazzitelli

Cosmological Dissipative Structure 1051
P. C. W. Davies

Are Kaluza–Klein Models of the Universe Chaotic? 1067
Jacques Demaret, Yves de Rop, and Marc Henneaux

First Flash and Second Vacuum 1081
David Finkelstein

Quantum Effects in Friedmann Space and Creation of Macroscopic Mass 1099
A. A. Grib

Inflationary Fallacies 1109
L. A. Khalfin

Statistics of the Galaxy Distribution 1125
Marc Lachièze-Rey

Perspectives in Observational Cosmology 1139
Pierre Léna

Highlights in Black Hole Astrophysics 1151
Jean-Pierre Luminet

Gravitons from Anomalous Decay 1163
Leonard Parker

Missing Mass or Dark Matter? 1169
E. Schatzman

Cosmology and Celestial Mechanics 1173
Victor Szebehely

Time and Quantum Gravity 1181
W. G. Unruh

International Journal of Theoretical Physics

Volume 28, Number 10 October 1989

CONTENTS

Automorphisms and Symmetries of Quantum Logics 1195
Vera Trnková

Spin Phase 1215
Marian Grabowski

Comment on Geometry of Hyperspin Manifolds 1229
Andrzej Borowiec

Hyperspin Manifolds and the Space Problem of Weyl 1233
H. Urbantke

Strongly Interacting Particles with Strongly Singular Potentials 1237
V. I. Yukalov

Reductions and Quantization 1255
Ivailo M. Mladenov

Topological Spin-Statistics Relation in Quantum Field Theory 1269
R. D. Tscheuschner

Geometric Classification of General Dynamical Systems 1311
A. Petrov

International Journal of Theoretical Physics

Volume 28, Number 11 **November 1989**

CONTENTS

Binary Quantum Logic and Generating Semigroups 1323
R. R. Zapatrin

Planck's Constant, Torsion, and Space-Time Defects 1333
D. K. Ross

Predictions of a Particle Model 1341
Stanley Gudder

Nonequilibrium Thermofield Dynamics 1351
E. Ahmed

Relativistic Zeeman Effect in Positronium, $n = 2$ 1359
Andrea Raspini

Reality As Complex Space 1371
Geoffrey Hemion

Entropy of Additive Cellular Automata 1387
Burton Voorhees

Lie-Symmetry Vector Fields for Linear and Nonlinear Wave Equations 1397
N. Euler and W.-H. Steeb

Hamiltonian Systems with Constraints: A Geometric Approach 1405
M. C. Muñoz Lecanda

Generalizations of the Kerr–Newman and Charged Tomimatsu–Sato Metrics in the Jordan–Brans–Dicke Theory 1419
Alberto Garcia D. and N. V. Mitskiévić

Kaluza–Klein Space and Strong Gravity 1425
S. Biswas, S. Kumar, and C. Sivaram

Analytic Solution of Gauge Field Equations for Lorentz Gravity 1437
Wei Mozhen, Shao Changgui, and He Changbai

International Journal of Theoretical Physics

Volume 28, Number 12 December 1989

CONTENTS

Gauge Symmetry and Supersymmetric Two-Particle Problem 1443
R. P. Zaikov

Space-Time Symmetries of Superstring and Jordan Algebras 1449
R. Foot and G. C. Joshi

Green Functions of Scalar Particles in Stochastic Fields 1463
M. Dineykhan, G. V. Efimov, and Kh. Namsrai

Ward Identity for Gauge Field in Stochastic Quantization with Nonlocal Form Factors 1483
M. Dineykhan and Kh. Namsrai

Self-Similar Cosmological Model: Technical Details, Predictions, Unresolved Issues, and Implications 1503
Robert L. Oldershaw

Nonlinear Electrohydrodynamic Instability Conditions of an Interface between Two Fluids under the Effect of a Normal Periodic Electric Field. III 1533
E. F. El Shehawey and N. R. Abd El Gawaad

Author Index to Volume 28 1559
